

Bay Area Air Quality Management District Carl Moyer Program Program Overview Fact Sheet

What is the Carl Moyer Program?

The Carl Moyer Memorial Air Quality Standards Attainment Program (Carl Moyer Program) is a state funded program that offers grants to owners of heavy-duty vehicles and equipment in order to reduce air pollution emissions from heavy-duty engines. Grants are available on **August, 8 2011** for projects that:

- Install particle traps on engines to reduce emissions,
- Replace older heavy-duty engines with newer and cleaner engines and add a required particle trap,
- Purchase new vehicles or equipment that are cleaner than the law requires,
- Replace heavy-duty equipment with electric equipment, and/or
- Install electric idling-reduction equipment.

Grants cannot be used for emissions reductions projects that are required by law or by a contract or agreement. However, if an emissions reduction occurs 3 years prior to a requirement, funding is allowed. For example, if a state fleet rule requires that an engine's emissions be reduced by January 1, 2013, grants can be awarded to reduce those emissions as long as the funded equipment is operational by January 1, 2010.

All vehicles and equipment funded with a grant must operate a certain percentage within the Air District's boundaries. The District is accepting applications for projects throughout its jurisdiction, but will prioritize projects that reduce emissions in highly impacted communities. Highest priority will be given to the following six highly impacted communities:

1) Concord, 2) Richmond/San Pablo, 3) Western Alameda County, 4) San Jose, 5) Redwood City/East Palo Alto, and 6) Eastern San Francisco.

For a Priority Community Map of highly impacted communities in the Bay Area, see: <http://www.baaqmd.gov/moyer>. The following counties are part of the Air District's jurisdiction: Alameda, Contra Costa, Marin, San Mateo, San Francisco, Santa Clara, and Napa counties. The southern portions of Solano and Sonoma counties are also part of the Air District.

What are my chances of getting funding?

Up to \$14 million in Carl Moyer Program funding will be available for emission reduction projects in the Bay Area in 2011-2012. Carl Moyer Program funds are awarded on first-come, first-served basis based on staff's determination of completeness of the application. Historically, the grants have gone to projects that involve older engines with high annual mileage, fuel use or operating hours. What is considered an older or high annual mileage engine will vary depending on engine application (e.g. marine, on-road, off-road, etc). Projects are weighted based on the emissions reduced. As older engines tend to be higher polluters, these are generally more cost-effective projects.

What will happen if I am awarded a Carl Moyer grant?

Engine owners with successful projects must sign a grant agreement with the Air District and agree to a number of conditions, including:

- Participating in a pre-project inspection. All existing engines funded must be in working condition at the time of the award.

- Participating in a post-project inspection to confirm that the project has been completed as stated in the grant agreement. For engine replacement projects this inspection includes documenting the destruction of the original engine.
- Agreeing that the engine, equipment or vehicle covered by the grant agreement will continue to operate in the Bay Area at similar usage rates as before the project was completed. This requirement typically lasts between three and ten years.
- Submitting annual monitoring reports that document the mileage, fuel use or operating hours and location where the engine operates.
- Maintaining general and property liability insurance and (when required) machinery insurance equal to the full replacement value of the equipment covered under the grant agreement.
- **Note:** This is not a complete list of the requirements for the program.

What can I do now, before I start my application?

- Review the fact sheet for your specific project type online:
 - Agriculture: www.baaqmd.gov/agriculture
 - Marine www.baaqmd.gov/marine
 - Shore Power: www.baaqmd.gov/shorepower
 - Off-Road www.baaqmd.gov/offroad
 - On-Road: www.baaqmd.gov/trucks
 - Locomotives: www.baaqmd.gov/trains
- Contact your engine or equipment dealer to discuss possibilities for your equipment.
- Understand any applicable state fleet rules and pending fleet rules that may cover your fleet.
- Review the California Air Resources Board (ARB) 2008 Carl Moyer Program Guidelines chapter specific to the engine type. The Guidelines are on the ARB webpage <http://www.arb.ca.gov/msprog/moyer/moyer.htm>.
- Contact the Air District with additional questions that you may have.

When will applications be available?

Applications will be available on the Air District website <http://www.baaqmd.gov/moyer> starting **August 8, 2011**. Applications that are determined to be **complete** will be evaluated on a first come first served basis and applications will be evaluated until all funds are spent. For more information, contact the Air District's grant programs hotline at 415-749-4994.
